

## TVBS CRAFTS 2009

*There is a sample of all the crafts enclosed (except the Crown of Life). The crafts can be done in any order. The Crown of Life/God's Eye would probably work best for the Resurrection lesson, otherwise they can be interchangeable.*

### **Materials you will need to get:**

- glue (either craft or regular school glue)
- scissors
- yarn (many times there is a knitter in the congregation to check with) If you do purchase yarn I recommend WalMart cheap variegated-type.
- clip clothes pins (8/child)
- white, yellow or bright crayon (for lower grade glitter cross)

### **Crafts:**

#### Lower Grade

##### **Foam Mosaic Cross Magnet**

- glue large squares

##### **Glitter Cross Magnet or Hanging**

- before class write "Jesus Loves (name)
- try using q-tips to spread glue on cross
- drizzle glitter over a box top to catch excess and reuse
- use magnet or yarn for hanging

##### **Bead & Cross Key Chain**

- use pipe cleaner and attach to key chain before class
- help children get the cross threaded and finish the edge

##### **Crown of Life**

- before class write the Bible verse "Be faithful to death, and I will give you a crown of life." Rev. 2:10 on each crown
- let the children color and decorate with stickers and stars.

##### **Door Hanger**

- glue foam hearts and wooden cross to door hanger
- wooden cross can be colored with marker

#### Upper Grade

##### **Foam Mosaic Cross Magnet**

- glue small squares

##### **Clothespin Cross**

- glue the cross first
- glue the front last

##### **Bead & Cross Key Chain**

- colored string should be 24" long
- help them attach the string to the key chain
- both string pieces go through bead
- each string then comes up and around and through again
- help the students attach the cross and tie the ends.

##### **God's Eye**

- the children may need help getting the center started.
- they wind the yarn completely around each stick and go on to the next
- some kids really like this project and can gather sticks to use also

##### **Door Hanger**

- make interesting edges by tearing instead of cutting
- wooden cross can be colored with marker
